Winona Municipal Airport 2005 Winona, MN	Runway, Ramp	45,900
Worland Municipal Airport-1992 Worland, WY		**

## **2006 Construction Season Summary:**

**33 Projects were completed on airfields around the country in 2006. 8 projects were done on Commercial service airports, three of these being Grooved Runways. 2 DOD projects were completed, one of which was a runway for the United States Navy. Approx. 3.2 million Square Yards of pavement were treated this year alone.**

## **Airport project totals to date:**

*Approximately 135 airports have used Asphalt Systems GSB products successfully.* These treatments have been done on all types of pavements, grooved runways, PFC runways, as well as many other standard mixes. These treatments have also been exposed to almost all types of high performance aircraft, and all kinds of different climates, from Alaska to Florida. More than half of these users are repeat customers. *More than 20.7 million Square Yards of airport pavements have now been treated with GSB products.*

\*\* Research is underway to verify square yardage for these projects.

*Asphalt Systems Inc. has a great staff of very knowledgeable people to help you design a preservation system that is right for your airport pavements.*

*Please contact us any time at our toll free number 1-800-972-2757*
